SYSTEM AND METHOD FOR DIGITALLY
PROVIDING AND DISPLAYING ADVERTISEMENT
INFORMATION TO CINEMAS AND THEATRES

Assistant Commissioner of Patents
Washington, D.C. 20231

1. I, David H. Sprogis, of 36 Chester Street, Watertown, Massachusetts 02472,
hereby declare as follows:

2. I am the sole inventor of the subject matter of the above referenced patent application.

3. I am the Manager of CineCast LLC, a Delaware Limited Liability Corporation located at 121 Columbia Street, Cambridge, MA 02139. CineCast LLC was formed August 31, 1999. See Appendix A attached hereto.

4. I conceived of the invention as claimed in the above referenced application while waiting for the movie "Antz" to begin at a movie theatre on or about December 5, 1998.

5. At that time, I was employed by Rational Software Corporation of Cupertino, California. Rational Software Corporation sells software life-cycle tools that assist in

product development and management programs for software systems as well as a wide variety of other programs involving system modeling processes. I was employed by Rational Software Corporation as a Tool Systems Engineer in Lexington, Massachusetts from about March 1998 through April 1999. At Rational Software Corporation I was involved with implementing software license enforcement features using, in part, the programming language C++. My work at Rational Software Corporation did not relate to movies, advertisements, image processing systems or the design of database systems.

6. Prior to working at Rational Software Corporation, I was employed by Quadris Corporation of Wellesley, Massachusetts from about February 1997 - about February 1998. At Quadris Corporation I provided consulting services for a financial systems relational database for Fidelity Corporation.

7. Prior to working at Quadris Corporation, I was employed by Powersoft Corporation of Concord, Massachusetts from about April 1995 - February 1997. At Powersoft Corporation I developed software tools that permitted customers to write applications using the Powerbuilder database access language software.

8. I have continuously and diligently developed the invention in the United States as claimed in the above referenced patent application from December 1998 through at least July 28, 2000. The system was originally called "E-Cast" and the tables attached hereto as Appendix B show the names and latest modification dates of some of the archived files and documents relating to the first proposals for the system that were created in early 1999.

9. The tables attached hereto as Appendix C show the names and latest modification dates of some of the archived files and documents relating to software used in the process of presenting content to the theatre screens that is disclosed, at least in part, on Page 17, lines 9-14 and shown in Figure 3 of the above reference patent application.

10. The tables attached hereto as Appendix D show the names and latest modification dates of some of the archived files and documents, created in 1999, relating to server-side architecture that is disclosed, at least in part, on Page 24, line 6 through Page 25, line 4 and shown in Figure 6 of the above referenced patent application.

11. The tables attached hereto as Appendix E show the names and latest modification dates of some of the archived files and documents, created in 1999, relating to the presentation that is disclosed, at least in part, on Page 10, lines 12-16 of the above referenced patent application.

12. The tables attached hereto as Appendix F show the names and latest modification dates of some of the archive files and documents, created at the end of 1999, along with snap-shot pictures of the resulting screen images that are disclosed, at least in part, on Page 10, lines 12-16 and shown in Figure 1 of the above referenced patent application.

13. On or about January 1, 2000, CineCast began using the Perforce Software Configuration Management System software sold by Perforce of Alameda, California to track changes to the software as it was being developed from January 2000 forward. This software management system is still being used today. Attached as Appendix G is a

revision control change log for the software that shows changes to the program from January 24, 2000 through November 29, 2000.

14. On March 17, 2000 the system first became operational and was shown at the General Cinemas in Framingham, Massachusetts. New England Cable Network (NECN) News ran a video news piece on General Cinemas and the CineCast system at the time of the release. With reference to Appendix H, a copy of the video news piece is available at the CineCast website under Press (<http://www.cinecast.com/press/htm>).

15. The system of the invention is presently being shown at 117 screens in theatres in New York and New Jersey.

16. I have read the Office Action mailed on October 3, 2002 in connection with the above-referenced application, and the company Vela LP that is referred to in the "CineCast HD internet product summary" document that is cited in the office action is unrelated to me and to the assignee of the present application, CineCast LLC. I became aware of the company Vela LP in or about November 2000.

17. The company National Cinema Network (NCN) that is referred to in the office action in connection with the "NCN Inc.com Background information published 9/25/02", the "Proxima and NCN partnership from Business Wire dated June 25, 1999" and the "DTDS trademark information filed December 30, 1999" is also unrelated to me and to the assignee of the present application, CineCast LLC. I became aware of NCN's DTDS system in or about September 2000.

18. I have reviewed each of the documents that are referenced in the accompanying Response to Requirement for Information under 37 C.F.R. §1.105, and the patent document identified therein was referenced by myself during the drafting of the provisional patent application, if at all, as background material regarding the format of patents only. In drafting the provisional patent application, I relied on my technical background knowledge and experience. I may have also relied on background information regarding any of the products and companies identified in the provisional patent application, and may have further relied on or more of the websites identified in the Response to Request Under 37 C.F.R. §1.105 filed herewith.

19. To the best of my recollection, the closest prior art of which I was aware when I conceived of the invention is disclosed in the background section of the present application.

20. I acknowledge that willful false statements and the like are punishable by fine or imprisonment, or both, under 18 U.S.C. §1001, and that such willful false statements and the like may jeopardize the validity of the application or document or any registration resulting therefrom, and I further declare that all statements made of my knowledge are true and that all statements made on information and belief are believed to be true.

Date: November 27, 2002

Notary:

Date: November 27, 2002
